<ul style="list-style-type: none">Falling objectsVisual		<ul style="list-style-type: none">Slipping hazards
PERSONAL PROTECTIVE EQUIPMENT		
<ul style="list-style-type: none">Eye and face protection		<ul style="list-style-type: none">Safety boots/shoes
SAFE OPERATING PROCEDURES		
<ul style="list-style-type: none">Review safe practice rules for applicable equipment (including rental equipment) and perform pre-operational checks.Employees shall be properly trained using lube rack. Consult manual or operating instructions.Make sure hoist ramps are completely down before entering or exiting lube rack.Park vehicle properly centering vehicle over hoist posts on lube rack.Check hoist rams for proper positioning prior to lifting vehicle.Check overhead clearance of vehicle while raising.Be sure all safety devices on vehicles are secure prior to lifting.When guiding vehicle onto lube rack, do not stand between front end of vehicle and wall.If the hoist is equipped with a locking safety device, the device must be in the locked position while vehicle is in the raised position. Other hoists not equipped with a locking safety device are equipped with a hydraulic restrictor valve that allows the host to come down very slowly.For hoists with independently activated ramps, be sure they are used simultaneously to keep vehicle level.Eye protection shall be worn while servicing vehicles.Spilled oil or grease shall be cleaned up immediately. Cleanup entire area when servicing is completed.Raise the bad door all the way up when entering or exiting.Insure that there is adequate ventilation while engine is running.Air operated grease guns create a very high pressure. Be sure hand and all other parts of the body are clear of the gun. Do not point gun at others. Check condition of flexible hoses.Lift capacity must be posted.Lift controls must be clearly labeled.Facilities for quick drenching or flushing of the eyes and body shall be provided.		
TEST		
QUESTION	ANSWERS	
	TRUE	FALSE
1 Lift capacity must be posted.		
2 Eye protection shall not be worn while servicing vehicles.		
3 Be sure all safety devices on vehicles are secure prior to lifting.		
4 Employees shall be properly trained using lube rack.		
5 Park vehicle properly centering vehicle over hoist posts on lube rack.
